

Introduction to ETIP Bioenergy

Patrik Klintbom, Chair ETIP Bioenergy

Steering Committee

World Bio Market, 20.03.2018

The European Technology and Innovation Platform Bioenergy...

- Bases on the European Commission's Energy Union strategy
- Is a continuation of
 - the European Biofuels Technology Platform (EBTP, launched 2006) and
 - the European Industrial Bioenergy Initiative (EIBI, launched 2010)
- Established in April 2016

ETIP Bioenergy has the role...

- to bring together relevant actors from academia, industry and civil society engaged in the development of sustainable bioenergy and competitive biofuel technologies
- to represent the unbiased, united, and consolidated view of the biofuels and bioenergy industry in Europe
- to act as the main interlocutor for DG RTD to implement the Strategic Energy Technology Plan in the field of biofuels and bioenergy for the full TRL scale

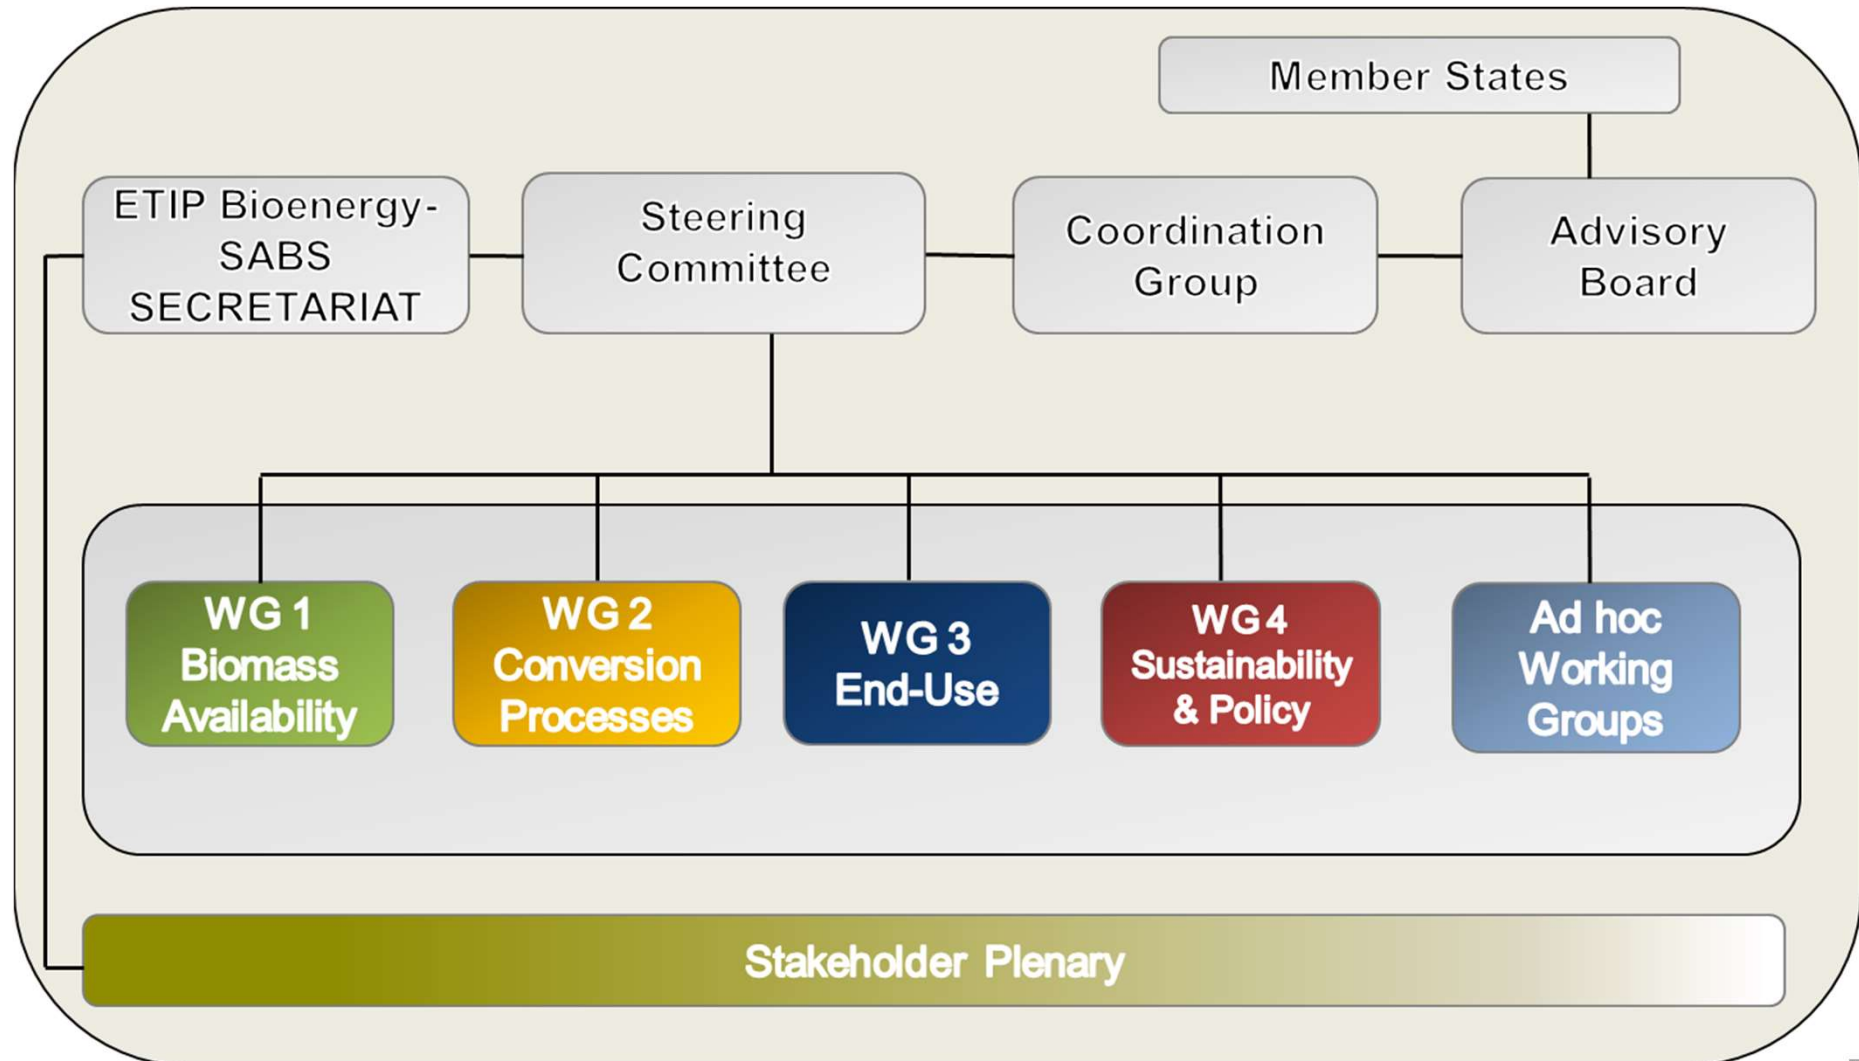

ETIP Bioenergy mission...

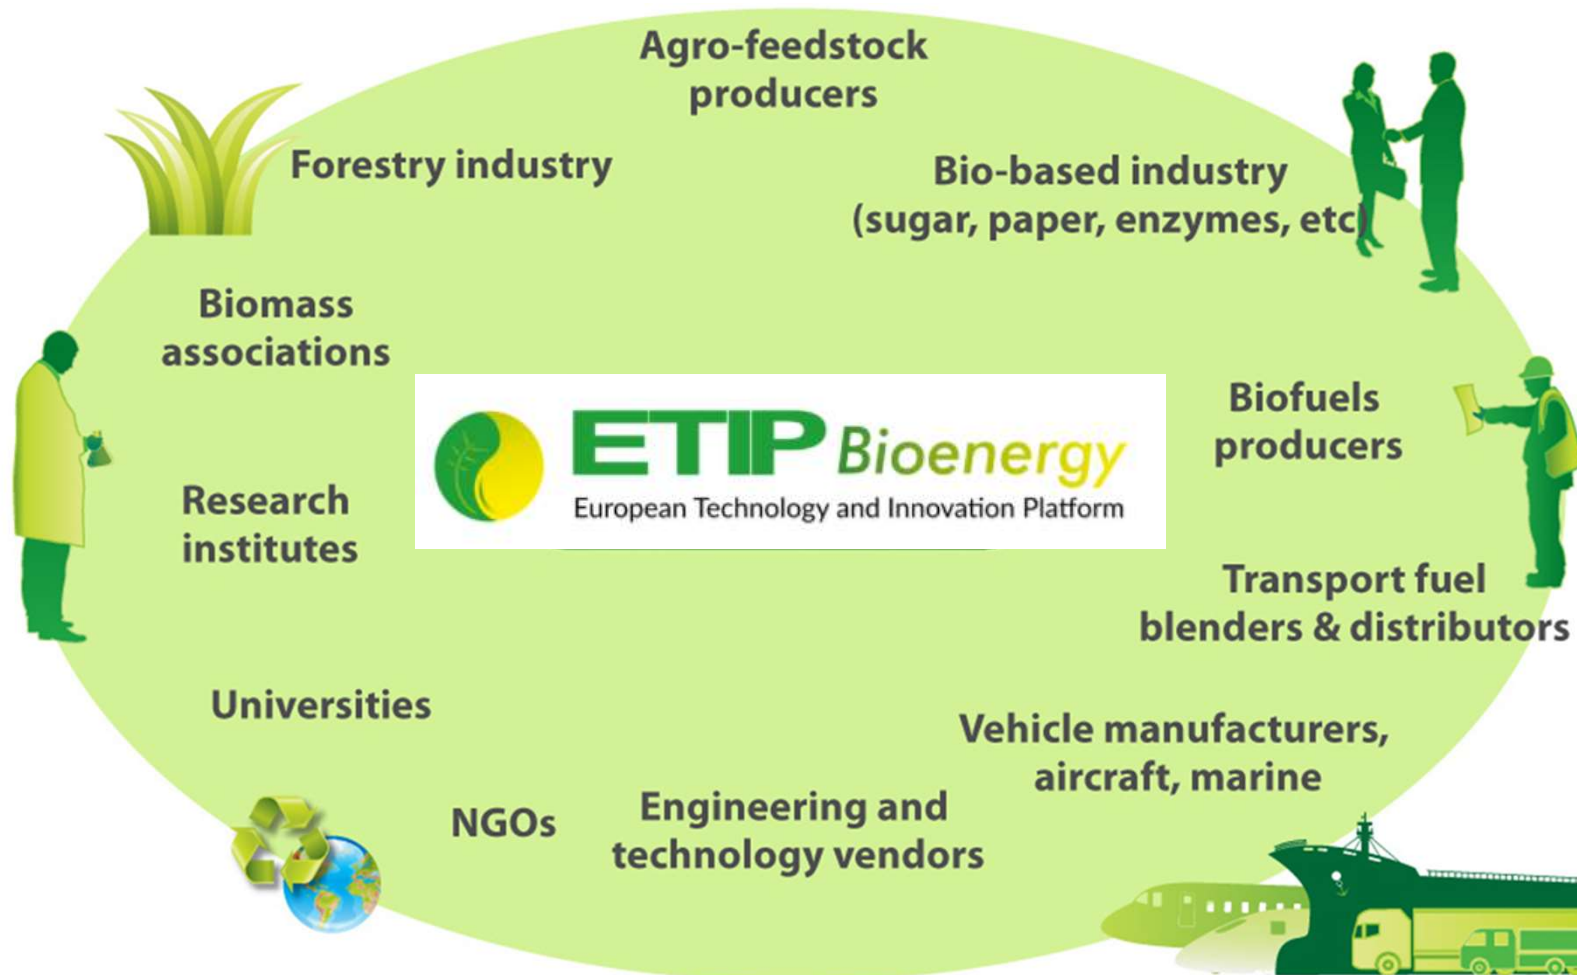

...is to contribute:

- to the development of cost-competitive world-class bioenergy and biofuel value chains,
- to the creation of a healthy bioenergy industry,
- to accelerate the sustainable deployment of biofuels and bioenergy in the EU, and
- to promote research, technology development and demonstration in the field of bioenergy

Organisation of ETIP Bioenergy

Stakeholders of the ETIP Bioenergy

ETIP Bioenergy Activities

- Support of the SET Plan Implementation – current focus TWG8 Renewable Fuels and Bioenergy
- Mapping of research projects, reports, pilot and demo plants
- Stakeholder Plenary Meetings (9 so far; no. 8 11-12 Apr 2018)
- Launch and update of the Strategic Research and Innovation Agendas (2008/2010/2016)
- Specific working group activities
- Fact sheets
- Position papers (iLUC, RED, SET Plan Key Action 8, etc.) & consultations
- Cooperation with other ETIPs (RES&Bioeconomy)
- Main communication tool: website www.etipbioenergy.eu

Upcoming events

- Workshop at EUSEW 4th of June, Brussels
 - Emerging technologies
- Workshop at SDEWS in Novi Sad 1st of July
 - Bioenergy value chains
