

The indispensable role of bioenergy and renewable fuels in the Green Transition

10th Stakeholder Plenary Meeting

Day 1 | Renewable Fuels and their market readiness

Day 2 | Overview on technology innovations

**Day 3 | Sustainable biomass feedstock base in Europe
Opportunities and challenges**

**| Panel Discussion -
The fast way forward & implementation barriers**

16-17-18 November 2021
ONLINE

10th Stakeholder Plenary Meeting

16-18 November 2021

**Patrik Klintbom, RISE Research Institutes
of Sweden, Chair ETIP Bioenergy Steering
Committee**

**Raising awareness,
delivering solutions.**

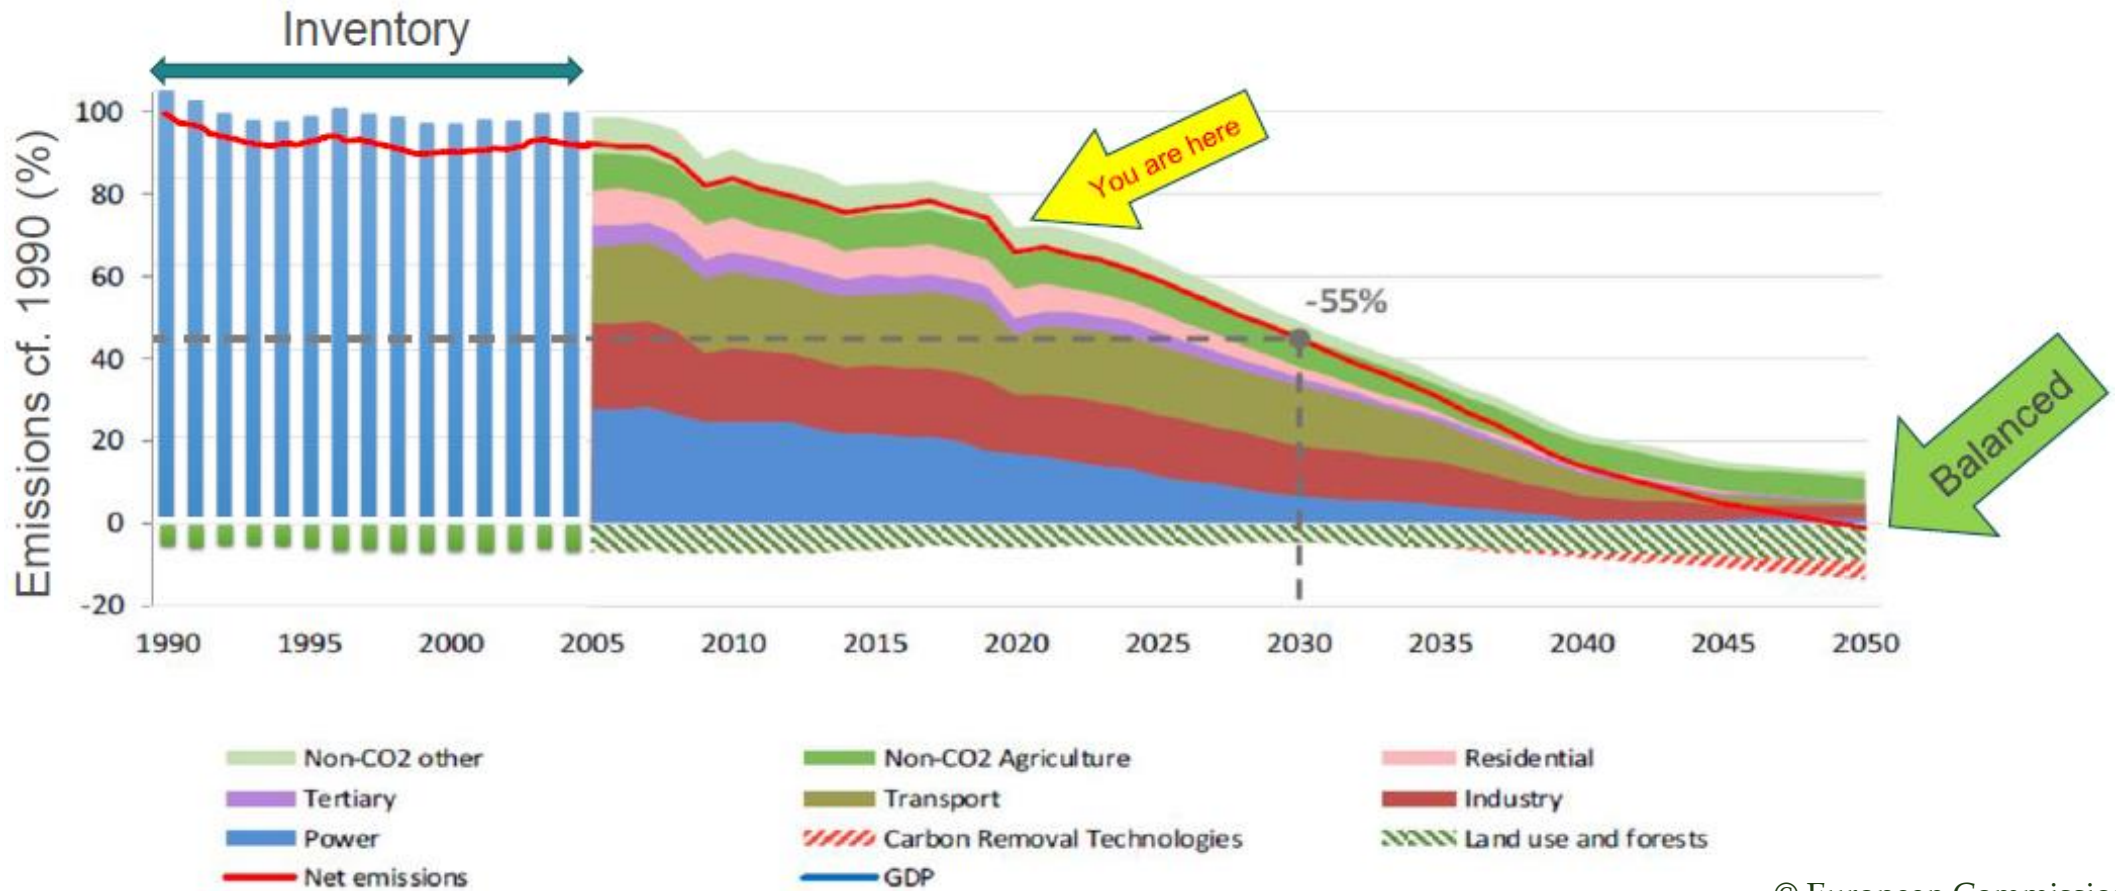

Need for bioenergy deployment in the EU

- **No significant reduction of energy consumption or GHG emissions in the European transport sector for the past decades;**
- **Market development in contrast to ambitious climate and energy targets on EU and international level;**
- **Bioenergy is the only option to reduce GHG emissions in the transport sector immediately – as low level blends and drop in fuels can be used in the whole vehicle fleet;**
- **Decade of political uncertainty – more clarity now with REDIII and Fit for 55.**

Pathway to climate neutrality

The indispensable role for bioenergy and biofuels in the Green Transition

- **Bioenergy is a central part of climate mitigation in Europe:**
 - **Representing over half of the renewable energy sources used;**
 - **No climate deal without sustainable biomass management and use;**
- **Need for a holistic fact-based approach;**
- **The European Commission, the European Parliament and national governments must ensure that the role of bioenergy is recognised and prioritised consistently;**
- **ETIP Bioenergy prepared to contribute!**

- **You are kindly invited to join the ETIP Bioenergy!**
- **We would be happy to discuss collaboration possibilities with you:**
secretariat@etip-bioenergy.eu
- **Participation in the ETIP Bioenergy is free of charge**
