

ETIP Bioenergy Working Group 1 Biomass Feedstock Webinar

Sustainable biomass and low-ILUC-risk options in agriculture

15 April 2020, 2:30:00 PM - 3:30:00 PM CEST

Moderator & Speaker:
Calliope Panoutsou

Imperial College of London,
UK

Speaker:
Wibke Baumgarten

FNR,
Germany

Speaker:
Andrea Parenti

University of Bologna,
Italy

Presentation Summary

During these times of social distancing due to COVID-19, the whole bioenergy community is working from home. The European Technology and Innovation Platform Bioenergy is making efforts to keep in touch with our all our members, to keep ourselves and you informed about the latest developments and to facilitate social interaction among us. Join the webinar of the platform's Working Group 1 - Biomass Feedstock. The agenda will discuss the latest developments and innovative solutions for the sustainable production of biomass and low-ILUC risk options in agriculture.

Agenda:

- Growing perennial crops on marginal land in Europe for bioenergy;
- Results of innovative cropping schemes for integrated food-and-biomass crops
- The role of agriculture in soil carbon storage and how to empower farmers
- Discussion and short updates on challenges, policy and research trends,
- Planning of the Working Group activities and publications for 2020.

We value your feedback and advice, join us in this discussion and share your thoughts and ideas with us.
